

VISIT ONE: PARTICIPANT SCREENING

- 1) Participant ID
- 2) Research team member collecting data
- 3) Participant attended screening appointment
- 4) Date and time of Appointment
- 5) Participant National Malawian Identification Checked
- 5a) Other identification
- 6) Participant Age
- 6a) Date of Birth (confirm against ID)
- 7) Participant can read English and/or Chichewa
- 8) Participant can read the first paragraph of the information sheet out loud
- 9) Participant lives within one hour (public transport) of the research ward
- 10) Health Passport Available and Checked
- 11) Participant Health Today
- 11a) Cough?
- 11b) Cold symptoms (e.g. runny nose)
- 11c) Sore throat?
- 11d) Other?
- 11e) Other Symptoms
- 12) Participant gender

Participant has close physical contact (e.g. sleeps in the same room or nurses) with:

- 13) Children under 5 years age
- 14) An elderly (>65 years of age) person
- 15) Someone who has chronic illness that stops them from leaving the house
- 16) Someone who has HIV-infection and is losing weight or has chronic cough or chronic diarrhoea

MEDICAL HISTORY (patient history and health passport)

- 17) Does the participant have any allergies?
- 17a) Allergy to penicillin or amoxicillin
- 17b) What was the allergic reaction
- 17c) Allergic to what?
- 17d) What was the allergic reaction?
- 18) History of previous pneumococcus disease?
- 18a) Otitis media?
- 18b) Sinusitis?
- 18c) Meningitis?
- 18d) Pneumonia?
- 18e) Other?
- 19) Evidence of severe pneumococcus disease in health passport
- 20) Does the participant have known HIV-infection
- 21) Has the participant had a HIV-test in the last three months?
- 21a) Is HIV-test negative and verified in participant Health Passport
- 22) Does the participant have diabetes mellitus?
- 23) Does the participant have asthma?
- 23a) Does the participant take inhaled or oral steroids?
- 23b) Has the participant used a salbutamol (blue) inhaler or taken any medications for asthma in the last year?
- 24) Does the participant have any other respiratory disease
- 24a) Further information on respiratory disease
- 25) Is the participant treated for high blood pressure?
- 25a) What treatments does the participant take?
- 26) Does the participant have known cardiac disease?
- 26a) What is the cardiac diagnosis and how does it affect the participant?
- 27) Has the participant had a previous stroke or TIA

- 27a) Has the stroke caused any disability?
- 28) Does the patient have any other neurological disease (e.g. epilepsy, chronic headache/migraine or neuromuscular weakness)?
- 28a) Details of neurological disease
- 29) Does the participant have any visual impairment?
- 30) Does the participant have any hearing impairment?
- 31) Does the participant have known liver disease (including hepatitis B or C)?
- 31a) Details of liver disease
- 32) Does the participant have any gastrointestinal disease (including diarrhoea or weight loss)?
- 32a) Details of gastrointestinal disease
- 33) Does the patient have any known renal disease?
- 33a) Details of renal disease
- 34) Does the participant have any endocrine disease (e.g thyroid problems)
- 34a) Details of endocrine disease
- 35) Does the participant have any history of cancer?
- 35a) Details of cancer
- 36) Does the participant have a history of osteoporosis?
- 37) Does the patient have any other health issues?
- 37a) Details of other health concerns

SOCIAL HISTORY

- 38) Participant smoking history
- 39) Does participant drink alcohol more than twice per week?
- 40) Participant pregnancy status

DRUG HISTORY

- 41) Does the participant take any regular medication?
- 41a) Medication name
- 41b) Medication dose and frequency (e.g 50mg three times per day)
- 41c) Medication indication
- 42) Does the participant take regular steroids (oral, inhaled or nasal)?
- 43) Has the participant had any recent vaccinations?
- 43a) Vaccination details (type, when administered)

CLINICAL EXAMINATION

- 44) Participant verbally consents to clinical examination?
- 45) Cardiac examination
- 45a) Description of heart sounds
- 46) Pulse rate (beats per minute)
- 47) Oxygen saturations on room air (%)
- 48) Systolic blood pressure (mmHg)
- 49) Diastolic blood pressure (mmHg)
- 50) Tympanic body temperature (degrees Celsius)
- 51) Participant height in metres (e.g 1.75m)
- 52) Participant weight in kilograms (e.g. 70kg)
